

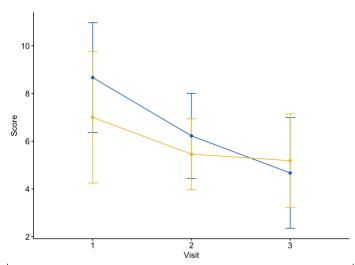

Figure 1 Beck Suicidality Scale Over 2-week Propofol Treatment

There was no main effect of randomization F(1,47) = 0.59 p>0.05

nor was there an interaction between randomization and study visit F(1,38)=0.76 p>0.05.

However, there was a main effect of Study Visit F(1,38) = 5.37 p<0.05, ηp2 = 0.12
